North Central Regional Transit District (NCRTD)  
Resolution 2016-17

A RESOLUTION AUTHORIZING THE NORTH CENTRAL REGIONAL TRANSIT DISTRICT TO APPLY FOR FEDERAL FUNDING THROUGH THE FFY2016 SECTION 5339(b) BUS FACILITIES GRANT PROGRAM FOR A MAINTENANCE FACILITY, WASH BAY, AND FUELING STATION

WHEREAS, the USDOT issued a notice for funding availability for the FFY2016 Section 5339(b) Bus Facilities Grant Program on March 29, 2016; and

WHEREAS, the NCRTD will submit its application to NMDOT by May 6, 2016 to be included in the State’s consolidated application to USDOT and FTA, which has a submittal deadline of May 13, 2016; and

WHEREAS, the NCRTD has identified capital improvements related to the efficient and effective day-to-day operations and maintenance of fleet; and

WHEREAS, upon selection to receive FFY2016 Section 5339(b) Bus Facilities Grant Program funds, the NCRTD is committed to provide a twenty (20) percent match ($1,234,210) of overall project cost ($6.171 million); and

WHEREAS, the NCRTD was created through legislative enactment (NMSA 1978, Section 73-25-1 et seq.); and

WHEREAS, the NCRTD is a sub-division of the State of New Mexico; and

WHEREAS, the NCRTD was approved and certified by the New Mexico Department of Transportation on the 14th day of September 2004;

NOW, THEREFORE, BE IT RESOLVED by the NCRTD Board that the request for NCRTD Board authorization and support of Staff submitting for a FFY2016 Section 5339(b) Bus Facilities Grant Program grant to fund a new Maintenance Facility, Wash Bay, and Fueling Station is approved.

PASSED, APPROVED AND ADOPTED BY THE GOVERNING BODY OF THE NORTH CENTRAL REGIONAL TRANSIT DISTRICT ON THIS 6th DAY OF MAY, 2016.

Daniel Barrowe, Chairman

Approved as to form:

Peter Dwyer, Counsel
2. Review and Selection Process

In addition to other FTA staff that may review the proposals, an inter-
agency technical evaluation committee with membership from one or more
agencies of the Coordinating Council on Access and Mobility may review
proposals under the project evaluation criteria. Members of the technical
evaluation committee and other involved FTA staff reserve the right to
screen and rate the applications received and to seek clarification from
any applicant about any statement in its application that FTA finds ambiguous and/or request additional
documentation to be considered during the evaluation process to clarify
information contained within the proposal.

After consideration of the ratings of the technical evaluation, the FTA will
determine the final selection and amount of funding for each project.
Geographic diversity and the applicant's receipt of other Federal funding may be
considered in FTA's award decisions. FTA may provide reduced funding or
fund only part of an application.

F. Federal Award Administration
Information

1. Federal Award Notices

FTA may publish awards in a Federal Register Notice and on the FTA public
Web site.

2. Administrative and National Policy
Requirements

i. Pre-Award Authority

The FTA will issue specific guidance to recipients regarding pre-award
authority at the time of selection. The FTA does not provide pre-award
authority for competitive funds until projects are selected and even then there
are Federal requirements that must be met before costs are incurred. For more
information about FTA's policy on pre-award authority, please see the FY 2016

ii. Grant Requirements

If selected, awardees will apply for a grant through FTA's electronic grant
management system and adhere to the customary FTA grant requirements. All
competitive grants, regardless of award amount, will be subject to the
congressional notification and release process. The FTA emphasizes that third-
party procurement applies to all funding awards, as described in FTA.
C.4220.1F. However, FTA may approve applications that include a specifically
identified partnering organization(s) (2 CFR part 200, Section 200.320, sub
paragraph (f)). When included, the application, budget and budget narrative
should provide a clear understanding of how the selection of these organizations
is critical for the project and of sufficient detail to understand the costs
involved.

iii. Planning

The FTA encourages proposers to engage the appropriate State
Departments of Transportation, Regional Transportation Planning Organizations,
or Metropolitan Planning Organizations in areas likely to be served by the
project funds made available under this programs.

iv. Standard Assurances

The applicant assures that it will comply with all applicable Federal
statutes, regulations, executive orders, FTA circulars, and other Federal
administrative requirements in carrying out any project supported by the FTA
grant. The recipient agrees that it is under a continuing obligation to comply
with the terms and conditions of the grant agreement issued for its
project with FTA. The recipient understands that Federal laws, regulations, policies, and administrative practices might be modified from time
to time and may affect the implementation of the project. The
recipient agrees that the most recent Federal requirements will apply to the
project, unless FTA issues a written determination otherwise. The recipient
must submit the Certifications and Assurances before receiving a grant if it does
not have current certifications on file.

3. Reporting

Post-award reporting requirements include submission of Federal Financial
Reports and Milestone Reports in FTA's electronic grants management system.

G. Federal Awarding Agency Contact

For questions about applying for the programs outlined in this notice, please
contact Danielle Nelson, FTA, Federal Transit Administration, phone: (202) 366-2160,
fax: (202) 366-3475, or email, Danielle.Nelson@dot.gov. A TDD
is available at 1-800-877-8339 (TDD/FRS).

Ellen Partridge,
Chief Counsel
FTR Doc. 2015-07008 Filed 3-28-16; 8:45 am

BILLING CODE P

DEPARTMENT OF TRANSPORTATION
Federal Transit Administration
FY16 Competitive Funding
Opportunity: Grants for Buses and Bus Facilities
and Low or No Emission
Grant Programs: 5339(b) Grants for
Buses and Bus Facilities Program and
5339(c) Low or No Emission Program

AGENCY: Federal Transit Administration (FTA), DOT.

ACTION: Notice of Funding Opportunity (NOFO).

SUMMARY: The Federal Transit Administration (FTA) announces the availability of approximately $211 million of Fiscal Year (FY) 2016 funds for the Section 5339(b) Grants for Buses and Bus Facilities Competitive Grant Program (Bus Program) and approximately $55 million for 5339(c) Low or No Emission Bus Competitive Grant Program (Low-No Program).

Funds awarded for the Bus Program will finance capital projects to replace, rehabilitate, purchase or lease buses and related equipment and to rehabilitate, purchase, construct or lease bus-related facilities, including programs of bus and bus-related projects for subrecipients that are public agencies, private companies engaged in public transportation, or private non-profit organizations. Funds awarded for the Low-No Program will finance the purchase or lease of low or no emission vehicles that use advanced technologies, including related equipment or facilities, for transit revenue operations.

Projects may include costs incidental to the acquisition of buses or to the construction of facilities, such as the costs of related workforce development and training activities, and project development. FTA may award additional funding that is made available to the program prior to the announcement of project selections.

DATES: Complete proposals must be submitted electronically through the GRANTS.GOV “APPLY” function by May 13, 2016.

FOR FURTHER INFORMATION CONTACT: For the Bus Program, contact Sam Sneed, FTA Office of Program Management, 202-366-1089, or sam.sneed@
2. The Low or No Emission Bus (Low-No) Program

Section 5339(c) of Title 49, United States Code, as established by Section 3017 of the FAST Act, authorizes FTA to award grants for low or no emission buses through a competitive process, as described in this notice. The Low or No Emission Bus Program (Low-No Program) provides funding to State and local governmental authorities for the purchase or lease of zero-emission and low-emission transit buses, including acquisition, construction, and leasing of required supporting facilities such as recharging, refueling, and maintenance facilities. FTA recognizes that a significant transformation is occurring in the transit bus industry, with the increasing availability of low and zero emission bus vehicles for transit revenue operations. The adoption of these technologically advanced vehicles will enable the country’s transportation system to move toward a cleaner and more energy-efficient future, as described in the U.S. Department of Transportation’s recent report, Beyond Traffic 2045. Accordingly, the purpose of the Low-No Program is to support the transition of the nation’s transit fleet to the lowest pollutants and most energy efficient transit vehicle technologies, thereby reducing local air pollution and direct carbon emissions, and to support the deployment of technologically advanced U.S.-made transit buses that have been largely proven in testing and demonstrations, but are not yet widely deployed in transit fleets.

B. Federal Award Information

1. 5339(b) Grants for Buses and Bus Facilities Competitive Program

The FAST Act amended 49 U.S.C. 5339 to provide competitive grants for eligible projects under the Bus Program and has authorized $213 million in FY 2016 to carry out the Bus Program. A one half of one percent take down authorized for oversight reduces this amount to approximately $211 million. A minimum of 10 percent of the amount awarded under the Bus Program will be awarded to States for projects located in rural areas.

2. 5339(c) Low or No Emission Competitive Program

The FAST Act established 49 U.S.C. 5339(c) to provide competitive grants for eligible projects under the Low-No Program and has authorized $55 million in FY 2016 to carry out the Low-No Program.
social service agency or private social service organization; revenues generated from value capture financing mechanisms; or funds from an undistributed cash surplus; replacement or depreciation cash fund or reserve; or new capital. In addition, transportation development credits or documentation of in-kind match may substitute for local match if identified in the application.

iii. Eligible Projects

Eligible projects are capital projects to replace, rehabilitate purchase, or lease buses, vans, and related equipment (including intelligent transportation system software), and capital projects to rehabilitate, purchase, construct, or lease bus-related facilities. Eligible projects under the Bus Program also include all projects otherwise eligible under the Low-No Program.

FTA is particularly interested in implementing the provisions of the FAST Act that permit applicants to use up to 0.5 percent of the FTA funds for workforce development activities eligible under 49 U.S.C. 5314 and an additional 0.5 percent for costs associated with training at the National Transit Institute. Applicants should identify the proposed use of funds for these activities in the project proposal and identify them separately in the project budget.

2. Low-No Program Eligibility

i. Eligible Applicants

Eligible applicants include direct recipients of FTA grants under the Section 5307 Urbanized Area Formula program, States, and Indian Tribes. Except for projects proposed by Indian Tribes, proposals for funding eligible projects in rural (non-urbanized) areas must be submitted as part of a consolidated State proposal. States and other eligible applicants also may submit consolidated proposals for projects in urbanized areas. Proposals may contain projects to be implemented by the recipient or its subrecipients. Eligible subrecipients include direct recipients of Section 5307 grants and local government authorities that operate fixed route transit service. If a single project proposal involves multiple public transportation providers, the unique agency acquires vehicles that will be operated by another agency, the proposal must include a detailed statement regarding the role of each public transportation provider in the implementation of the project.

An eligible recipient may submit an application in partnership with other entities that intend to participate in the implementation of the project, including, but not limited to, specific vehicle manufacturers, equipment vendors, owners or operators of related facilities, or project consultants. If an application involves such a partnership, the portion of funding allocated for the competitive selection process will be deemed to satisfy the requirement for a competitive procurement under 49 U.S.C. 5325(a) for the named entities. Applicants are advised that any changes to the proposed partnership will require FTA advance approval, would need to be consistent with the scope of the approved project, and may necessitate a competitive procurement.

Under the 5339(c) Low-No Program, as amended by the FAST Act, there no longer is a requirement that an eligible project or recipient be located in an area designated as an air quality non-attainment or maintenance area.

ii. Cost Sharing or Matching

All eligible expenses under the Low-No Program are attributable to compliance with the Clean Air Act. Therefore under the provisions of 49 U.S.C. 5323(f), the maximum Federal participation in the costs of leasing or acquiring a transit bus financed under the Low-No Program is 85 percent of the total transit bus cost. The proposer may seek a lower Federal contribution. Further, the maximum Federal participation in the cost of leasing or acquiring low or no emission bus-related equipment and facilities under the Low-No Program, such as recharging or refueling facilities, is 90 percent of the net project cost of the equipment or facilities that are attributable to compliance with the Clean Air Act. Eligible sources of match include the following: Cash from non-governmental sources other than revenues from providing public transportation services; revenues derived from the sale of advertising and concessions; amounts received under a service agreement with a State or local social service agency or private social service organization; revenues generated from value capture financing mechanisms; or funds from an undistributed cash surplus; replacement or depreciation cash fund or reserve; new capital; or in-kind contributions. In addition, transportation development credits or documentation of in-kind match may substitute for local match if identified in the application.

iii. Eligible Projects

Eligible projects are projects or programs of projects for purchasing or leasing low or no emission buses, acquiring low or no emission buses with a leased power source, constructing or leasing facilities and related equipment (including intelligent technology and software), for low or no emission buses, constructing new public transportation facilities to accommodate low or no emission buses, or rehabilitating or improving existing public transportation facilities to accommodate low or no emission buses. All proposed projects must be part of the intended recipient's long-term integrated fleet management plan.

Under the Low-No Program, a low or no-emission bus is defined as a passenger vehicle used to provide public transportation that significantly reduces energy consumption, air pollution, or direct carbon emissions, when compared to a standard vehicle. This includes zero-emission transit buses, which are defined as buses that produce no direct carbon emissions and no air pollutant matter emissions under any and all possible operational modes and conditions. Examples of zero emission bus technologies include, but are not limited to hydrogen fuel-cell buses and battery-electric buses. All transit bus models procured with funds awarded under the Low-No Program must complete FTA bus dwell testing and production transit buses pursuant to 49 U.S.C. 5318. The development or deployment of prototype vehicles is not eligible for funding under the Low-No program.

FTA is particularly interested in implementing the provisions of the FAST Act that permit applicants to use up to 0.5 percent of the FTA funds for workforce development activities eligible under 49 U.S.C. 5314 and an additional 0.5 percent for costs associated with training at the National Transit Institute. Applicants should identify the proposed use of funds for these activities in the project proposal and identify them separately in the project budget.

D. Application and Submission Information

1. Address

Applications must be submitted to Grants.gov. General information for submitting applications through Grants.gov can be found at grants.gov/howtoapply along with specific instructions for the forms and attachments required for submission. Failure to submit the information as requested can delay review of the application.

The FTA urges proposers to submit applications at least 72 hours prior to the due date to allow time to receive the
validation messages and to correct any problems that may have caused a rejection notification. The FTA will not accept submissions after the stated deadline. GRANTS.GOV scheduled maintenance and outage times are announced on the GRANTS.GOV Web site. Deadlines will not be extended due to scheduled Web site maintenance.

Prosiders are encouraged to begin the process of registration on the GRANTS.GOV site well in advance of the submission deadline. Registration is a multi-step process, which may take several weeks to complete before an application can be submitted. Registered proposers may still be required to take steps to keep their registration up to date before submissions can be made successfully: (1) Registration in the System for Award Management (SAM) is renewed annually; and, (2) persons making submissions on behalf of an Authorized Organization Representative (AOR) must be authorized in GRANTS.GOV by the AOR to make submissions.

Within 48 hours after submitting an electronic application, the applicant should receive email messages from GRANTS.GOV: (1) Confirmation of successful transmission to GRANTS.GOV, (2) confirmation of successful validation by GRANTS.GOV, and (3) confirmation of successful validation by FTA. If confirmations of successful validation are not received or a notice of failed validation and incoherent materials is received, the applicant must address the reason for the failed validation, as described in the email notice, and resubmit the application before the submission deadline. If making a resubmission for any reason, include all original attachments regardless of whether they were included and check the box on the supplemental form indicating this is a resubmission.

2. Content and Form of Application Submission
A complete proposal submission consists of at least two forms: The SF424 Mandatory Form and the relevant supplemental form for either the Bus Program or the Low-No Program. The application must include responses to all sections of the SF424 Mandatory Form and the relevant Supplemental Form, unless indicated as optional. The information on the supplemental form will be used to determine applicant and project eligibility for the program, and to evaluate the proposal against the selection criteria described in part E of this notice.

A separate supplemental form exists for the Bus Program and the Low-No program. Projects that use the inappropriate form will not contain the information necessary to determine eligibility of the project and will not be evaluated. Applicants may submit multiple proposals for one or both competitions in a single application, but must complete a separate "project detail" section of the appropriate supplemental form for each project.

The supplemental form must be placed in the attachments section of the SF424 Mandatory Form. Proposiors must use the relevant supplemental form(s) designated for the Bus Program and/or the Low-No Program and attach with them to the submission. If GRANTS.GOV cannot successfully complete the application process. A submission may include multiple supplemental forms, and a single supplemental form may contain multiple individual project proposals. All project proposals will be evaluated separately, regardless of whether they are submitted as a single submission.

An applicant may submit additional supporting documentation for each project proposal as attachments. Any supporting documentation must be described and referenced by file name in the appropriate response section of the supplemental form, or it may not be reviewed.

Information such as proposer name, Federal amount requested, local match amount, description of areas served, etc. may be requested in varying degrees of detail on both the SF424 form and Supplemental Form. Proposiors must fill in all fields unless stated otherwise on the forms. The Supplemental Form template supports pasting copied text from other documents; applicants should verify that pasted text is fully captured on the Supplemental Form and has not been truncated by the character limitations built into the form. Proposiors should use both the "Check Package for Errors" and the "Validate Form" validation buttons on both forms to check all required fields on the forms, and ensure that the federal and local amounts specified are consistent.

3. Unique Entity Identifier and System for Award Management (SAM)
All applicants must provide a unique entity identifier provided by the System for Award Management (SAM).

Registration in SAM may take as little as 3-5 business days, but since they could be unexpected steps or delays (for example, if you need to obtain an Employer Identification Number), FTA recommends allowing ample time, up to several weeks, for completion of all steps. For additional information on obtaining a unique entity identifier, please visit www.sam.gov. Further instructions on registration will be provided by FTA through an introductory applicant training session.

Dates and times for the training session will be posted on FTA’s Web site at www.fta.dot.gov/busprogram.

4. Submission Dates and Times

Project proposals must be submitted electronically through GRANTS.GOV by May 13, 2016. Mail and fax submissions will not be accepted.

5. Funding Restrictions
Funds under this NOFO cannot be used to reimburse applicants for otherwise eligible expenses incurred prior to FTA award of a Grant Agreement until FTA has issued pre-award authority for selected projects through a notification in the Federal Register, or unless FTA has issued a "Letter of No Prejudice" for the project before the expenses are incurred.

7. Other Submission Requirements
Applicants are encouraged to consider scaling projects in increments of 1 or 2 transit busses, in case insufficient funding is available to fund a project at the full requested amount. If an applicant indicates that a project is scalable, the applicant must provide an appropriate minimum funding amount that will fund an eligible project that achieves the objectives of the program and meets all relevant program requirements. The applicant must provide a clear explanation of how the project budget would be affected by a reduced award. Additionally, funding requests for workforce development activities must be addressed separately in the budget section of the application, and such activities must be attributable to the project being applied for.

E. Application Review

1. Evaluation Criteria for the Bus and Bus Facilities Competitive Program

FTA will evaluate project proposals for the Bus Program based on the criteria described in this notice. Projects will be evaluated primarily on the responses provided in the supplemental form. Additional information may be provided to support the responses provided, however, any additional documentation must be directly referenced in the supplemental form, including the file name where the additional information can be found.

1. Demonstration of Need
Applicants must demonstrate how the proposed project will address an unmet need for capital investment in bus vehicles and/or supporting facilities,
enhance the safety of the transit system for transit vehicle operators, riders, and the general public, or improve connectivity of bus systems with other networks through the use of deployment-ready information technologies. For example, an applicant may demonstrate a substantial backlog of deferred capital investment, insufficient size or capacity of maintenance facilities, excessive reliance on vehicles that are beyond their intended service life, a vehicle fleet that is insufficient to meet current ridership demands, or passenger facilities that are insufficient for their current use. For safety, an applicant may demonstrate safety concerns with vehicles, equipment, or facilities that are beyond their intended useful life, or that are no longer appropriate for use due to safety concerns. To improve connectivity, bus systems may deploy Intelligent Transportation System (ITS) technologies or software that link buses with other transportation networks. 

Applicants should also describe how the proposed project will improve the operation of the transit system and whether the project represents a one-time or periodic need that cannot reasonably be funded from FTA program formula allocations or State and/or local resources.

Applicants should provide the following information, which FTA will use to assess the need for capital investment underlying the proposed project:

a. For bus projects (replacement, rehabilitation or expansion): The age and condition of the asset(s) to be replaced or rehabilitated by the proposed project, relative to their intended useful life. Consistency with the relevant asset management plan. Condition and performance of the asset to be replaced by the proposed project, as ascertained through field inspections or otherwise, if available. For fleet expansion requests, the degree to which the proposed project will have a significant impact on service delivery. For both the Bus Program and Low-No Program, the proposal must address whether the project conforms to FTA’s spare ratio guidelines.

b. For bus facility and equipment projects (replacement and/or expansion): The age of the asset to be rehabilitated or replaced relative to its useful life. The degree to which the proposed project will enable the agency to improve the maintenance and condition of the agency’s fleet and/or other related transit assets. For expansion requests, the degree to which the proposed project addresses a current capacity constraint that is limiting the ability of the agency to provide an adequate level of service relative to current ridership demands or the degree the equipment will improve connectivity of bus systems to other networks and infrastructure.

2. Demonstration of Benefits

Applicants must demonstrate how the proposed project will support the creation of ladders of opportunity, which are defined for this competition as public transportation services that enable individuals to achieve increased economic security by supporting the following five Ladders of Opportunity Principles: (1) Enhanced access to work, (2) more transportation choices, (3) support for existing communities, (4) enhanced economic opportunities, and (5) support for partnerships between public agencies, non-profit organizations and the private sector. 

Enhanced access to work: FTA will evaluate whether the project will improve access for Americans with transportation disadvantages through reliable and timely access to employment centers, educational opportunities, services and other basic needs.

More Transportation Choices: FTA will evaluate whether the project will significantly enhance mobility through the creation of more convenient transportation options for travelers.

Support for Existing Communities: FTA will evaluate whether the project will increase community revitalization, improve the efficiency of public works investments or safeguard rural communities.

Enhanced Economic Opportunities: FTA will evaluate whether the project improves economic opportunities by linking capital investments with local workforce development opportunities and initiatives, including connections to employment and educational opportunities. FTA is particularly interested in projects that propose to utilize the eligibility of 0.5 percent of the proposed Federal funding for workforce development and/or 0.5 percent for training at the National Transit Institute. Please note that funding requests for workforce development activities must be addressed separately in the budget section of the application, and such activities must be attributable to the project being applied for.

Support for partnerships between public agencies, non-profit organizations and the private sector: FTA will evaluate the extent to which the proposed project will support strong partnerships between State or local public agencies, local non-profit organizations, and the private sector to improve mobility for individuals with limited access to economic opportunities. This includes the extent the applicant has or will bring local workforce development, training, education, veterans, transportation and planning stakeholders together with representation of key customer groups (people with low-incomes, people with disabilities, youths, veterans, elderly populations, etc.) to formulate a plan to create ladders of opportunity in an area.

3. Planning and Local/Regional Prioritization

Applicants must demonstrate how the proposed project is consistent with local and regional long-range planning documents and local government priorities. This will involve assessing whether the project is consistent with the transit priorities identified in the long-range plan; and/or contiguity/illustrative projects included in that plan; or the locally developed human services public transportation coordinated plan. Applicants are not required to submit copies of such plans, but should describe how the project will support regional goals and may submit letters of support from local and regional planning organizations attesting to the consistency of the proposed project with these plans.

Evidence of additional local or regional prioritization may include letters of support for the project from local government officials, public agencies, and non-profit or private sector partners.

4. Local Financial Commitment

Applicants must identify the source of the local cost share and describe whether such funds are available for the project or will need to be secured if the project is selected for funding. FTA will consider the availability of the local cost share as evidence of local financial commitment to the project. In addition, an applicant may propose a local cost share that is greater than the minimum requirement or provide documentation of previous local investments in the project, which cannot be used to satisfy local matching requirements, as evidence of local financial commitment.

5. Project Implementation Strategy

Projects will be evaluated based on the extent to which the project is ready to implement within a reasonable period of time. Among other factors, FTA will assess whether the project qualifies for a Categorical Exclusion (CE), or whether the required environmental work has been initiated.
or completed for projects requiring an Environmental Assessment (EA) or Environmental Impact Statement (EIS) under the National Environmental Policy Act of 1969 (NEPA), as amended.

Applicants should address whether project implementation plans are complete, including initial design of facilities projects. For vehicle acquisitions, the applicant should explain the status and timeline of the intended procurement strategy.

Applicants must also provide the timeframe under which the Metropolitan Transportation Improvement Program (TIP) and/or Statewide Transportation Improvement Program (STIP) can be amended to include the proposed project. This should be accompanied by evidence of MPO and/or State endorsement. In addition, the proposal should state whether funds can be obligated within 12 months from time of award, if selected. For projects that will require formal coordination, approvals or permits from other agencies or project partners, the applicant must demonstrate previous coordination with these organizations and their support for the project, such as through letters of support.

6. Technical, Legal, and Financial Capacity

Applicants must demonstrate that they have the technical, legal and financial capacity to undertake the project. FTA will review relevant oversight assessments and records to determine whether there are any outstanding legal, technical, or financial issues with the applicant that would affect the outcome of the proposed project.

FTA will also review the budgetary source local match. Applicants should submit evidence of the availability of funds for the project, for example by including a board resolution, letter of support from the State, or other documentation of the source of local funds.

Review and Selection Process

In addition to other FTA staff that may review the proposals, a technical evaluation committee will evaluate proposals based on the published evaluation criteria. Members of the technical evaluation committee and other FTA staff may request additional information from applicants, if necessary. Based on the findings of the technical evaluation committee, the FTA Administrator will determine the final selection of projects for program funding. FTA may consider geographic diversity, diversity in the size of the transit systems receiving funding, and/or the applicant’s receipt of other competitive awards in determining the allocation of program funds. Not less than 10 percent of the Bus and Bus Facility Program funds will be distributed to projects in rural areas. In addition, not more than 10 percent of the funds may be awarded to a single grantee.

2. Selection Criteria for the Low or No Emission Bus Program

FTA will evaluate project proposals for the Low-No Program based on the criteria described in this notice. Projects will be evaluated primarily on the responses provided in the supplemental form. Additional information may be provided to support the responses provided; however, any additional documentation must be directly referenced on the supplemental form, including the file name where the additional information can be found.

1. Demonstration of Need

Since the purpose of this program is to fund bus vehicles and facilities, applicants must demonstrate how the proposed project will address an unmet need for capital investment in bus vehicles and/or supporting facilities. For example, an applicant may demonstrate a substantial backlog of deferred capital investment, insufficient size or capacity of maintenance facilities for low or no emission vehicles, excessive reliance on vehicles that are beyond their intended service life, or a vehicle fleet size that is insufficient to meet current ridership demands.

Applicants should also provide the following information, which FTA will use to assess the need for capital investment underlying the proposed project:

a. For low or no emission bus projects (replacement, rehabilitation or expansion): The age and condition of the vehicles or facilities to be replaced or rehabilitated by the proposed project, relative to their intended useful life. The consistency of the proposed project with the proposer’s bus fleet management plan. The condition and performance of the vehicles to be replaced by the proposed project. For fleet expansion requests, the degree to which the proposed project will have a significant impact on service delivery. For both the Bus Program and Low-No Program, the proposal must address whether the project conforms to FTA’s spare ratio guidelines. Low or no emission vehicles funded under this program are not exempted from FTA’s standard spare ratio requirements which apply to and are calculated on the agency’s entire fleet.

b. For bus facility and equipment projects (replacement and/or expansion): The age of the asset to be rehabilitated or replaced relative to its useful life. The degree to which the proposed project will support the agency to improve the maintenance or operation of the agency’s existing low or no emission vehicles, and/or other related transit assets.

ii. Demonstration of Benefits

Applicants must demonstrate how the proposed project will support the successful deployment of vehicles with advanced propulsion technologies in regular transit operations. In particular, the applicant must demonstrate how the proposed project will support the following Low-No Program objectives: (1) Reduce Direct Carbon Emissions; (2) Reduce Particulate Emissions; (3) Support Deployment of Advanced Propulsion Technologies; (4) Demonstrate Successful Revenue Operation of New Technologies.

Reduce Direct Carbon Emissions:

Applicants should describe how the proposed vehicles or facility will reduce emissions of greenhouse gases from transit vehicle operations. FTA will evaluate the rate of direct carbon emissions by the proposed vehicles or vehicles to be supported by the proposed facility, the number of vehicles that will be in operation as a result of the proposed project, and the emissions from the vehicles that will be replaced or moved to the spare fleet as a result of the proposed project.

Reduce Particulate Emissions:

Applicants should describe how the proposed vehicles or facility will reduce the emission of particulates that create local air pollution, which leads to local environmental health concerns, smog, and unhealthy ozone concentrations. FTA will evaluate the rate of particulate emissions by the proposed vehicles or vehicles to be supported by the proposed facility.

Support Deployment of Advanced Propulsion Technologies: As described in the U.S. Department of Transportation’s "Beyond Traffic 2045", the transportation sector will need to significantly reduce its emissions of greenhouse gases. Accordingly, applicants should describe how the proposed project will introduce new vehicle technologies that reduce emissions and increase energy
efficiency into transit revenue operations. FTA will consider the prevalence of the proposed propulsion technology in the nation’s transit fleet, the degree to which the proposed technology reduces emissions as compared to more common vehicle propulsion technologies, and the capability of the proposed vehicle type to perform to an adequate level of performance in standard revenue operations, as evidenced by successful revenue service in similar operating environments.

Demonstrates Successful Revenue Operation of New Technologies: Applicants should describe how the proposed project will support the successful operation of new technologies in revenue service. FTA will evaluate the current or planned ability of the applicant to successfully operate and maintain the proposed vehicles or vehicle types to be supported by the proposed project. As the introduction of new technology may impact the skills needed by the applicant’s workforce, FTA is particularly interested in projects that propose to utilize the eligibility of 0.5 percent of the proposed Federal funding for workforce development and/or 0.5 percent for training at the National Transit Institute. Please note that funding requests for workforce development activities must be addressed separately in the budget section of the application, and such activities must be attributable to the project being applied for. Applicants should also address the appropriateness of the intended vehicles for the type of service proposed, in particular when considering vehicle operating range, charging or fueling requirements, or terrain. FTA will evaluate the consistency of the proposed project with the applicant’s long-term fleet management plan, as well as the applicant’s previous experience with the relevant low or no emissions vehicle technologies.

Planning and Local/Regional Prioritization

Applicants must demonstrate how the proposed project is consistent with local and regional long range planning documents and local government priorities. This will involve assessing whether the project is consistent with the transit priorities identified in the long range plan; and/or contingency/illustrative projects included in that plan; or the locally-developed human services public transportation coordinated plan. Applicants are not required to submit copies of such plans, but should describe how the project will support regional goals and may submit support letters from local and regional planning organizations attesting to the consistency of the proposed project with these plans.

Evidence of additional local or regional prioritization may include letters of support for the project from local government officials, public agencies, and non-profit or private sector partners.

Local Financial Commitment

Applicants must identify the source of the local cost share and describe whether such funds are currently available for the project or will need to be secured if the project is selected for funding. FTA will consider the availability of the local cost share as evidence of local financial commitment to the project. In addition, an applicant may propose a local cost share that is greater than the minimum requirement or provide documentation of previous local investments in the project, which cannot be used to satisfy local matching requirements, as evidence of local financial commitment. FTA will also note if an applicant proposes to use grant funds only for the incremental cost of new technologies over the cost of replacing vehicles with standard propulsion technologies.

Project Implementation Strategy

Projects will be evaluated based on the extent to which the project is ready to implement within a reasonable period of time. Among other factors, FTA will assess whether the project qualifies for a Categorical Exclusion (CE), or whether the required environmental work has been initiated or completed for projects requiring an Environmental Assessment (EA) or Environmental Impact Statement (EIS) under the National Environmental Policy Act of 1969 (NEPA), as amended. Applicants must provide information regarding their project implementation plans, including whether initial design of facilities projects has been completed. For vehicle acquisitions, the applicant must explain the status and timeline of the intended procurement strategy, and must demonstrate familiarity with the current market availability of the proposed advanced vehicle propulsion technology.

For project proposals that do not specify a particular manufacturer, model, or vendor, applicants must demonstrate that vehicles are available of the proposed type that meet or exceed FTA’s Buy America domestic content requirements.

For project proposals that involve a partnership with a manufacturer, vendor, consultant, or other third party, applicants must identify by name any project partners, including but not limited to other transit agencies, bus manufacturers, owners or operators of related facilities, or any expert consultants. FTA will evaluate the experience and capacity of the named project partners to successfully implement the proposed project based on the partners’ experience and qualifications. Applicants are advised to submit information on the partners’ qualifications and experience as part of the application. Entities involved in the project that are not named in the application will be required to be selected through a competitive procurement.

Applicants must also provide the timeframe under which the TIP and/or STIP can be amended to include the proposed project. This should be accompanied by evidence of MPO and/or State endorsement. In addition, the proposal should state whether grant funds can be obligated within 12 months from time of award, if selected. For projects that will require formal coordination, approvals or permits from other agencies or project partners, the applicant must demonstrate previous coordination with those organizations and their support for the project, such as through letters of support.

Technical, Legal, and Financial Capacity

Applicants must demonstrate that they have the technical, legal and financial capacity to undertake the project. FTA will review relevant oversight assessments and records to determine whether there are any outstanding legal, technical, or financial issues with the project that could affect the outcome of the proposed project. FTA will also review the proposed source of local match. Applicants should submit evidence of the availability of such funds for the project, for example by including a board resolution, letter of support from the State, or other documentation of the source of local funds.

Review and Selection Process

In addition to other FTA staff that may review the proposals, a technical evaluation committee will evaluate proposals based on the published evaluation criteria. Members of the technical evaluation committee and other FTA staff may request additional information from applicants, if necessary. Based on the findings of the technical evaluation committee, the FTA Administrator will determine the final selection of projects for program
funding. FTA may consider geographic diversity, diversity in the size of the transit systems receiving funding, and/or the applicant’s receipt of other competitive awards in determining the allocation of program funds. FTA may consider capping the amount a single applicant may receive.

F. Federal Award Administration

i. Federal Award Notice

Subsequent to an announcement by the FTA Administrator of the final project selections, which will be posted on the FTA Web site, FTA will publish a list of the selected projects, a summary of final scores for selected projects, Federal award amounts and recipients in the Federal Register. Project recipients should contact their FTA Regional Offices for additional information regarding allocations for projects under the Bus and Low-No Programs.

At the time the project selections are announced, FTA will extend pre-award authority for the selected projects. There is no blanket pre-award authority for these projects before announcement.

ii. Award Administration

Funds under the Bus and Low-No Programs are available to States, designated recipients, or eligible direct recipients of Section 5307 funds. There is no minimum or maximum grant award amount; however, FTA intends to fund as many meritorious projects as possible. Only proposals from eligible recipients for eligible activities will be considered for funding. Due to funding limitations, proposers that are selected for funding may receive less than the amount originally requested. In those cases, applicants must be able to demonstrate that the proposed projects are still viable and can be completed with the amount awarded.

iii. Administrative and National Policy Requirements

i. Pre-Award Authority

The FTA will issue specific guidance to recipients regarding pre-award authority at the time of selection. The FTA does not provide pre-award authority for competitive funds until projects are selected and even then there are Federal requirements that must be met before costs are incurred. For more information about FTA’s policy on pre-award authority, please see the FY 2016 Apportionment Notice published on February 16, 2016. https://www.gpo.gov/fdsys/pkg/FR-2016-02-16/pdf/2016-02821.pdf.

ii. Grant Requirements

If selected, awardees will apply for a grant through FTA’s Transit Award Management System (TRAMS). Recipients of Bus Program Funding in urban areas and all Low/No Emission recipients, are subject to the grant requirements of section 5307 Urbanized Area Formula Grant program, including those of FTA Circular 9030.1E. Recipients of Bus Program Funding in rural areas are subject to the grant requirements of Section 5311 Formula Grants for Rural Areas Program, including those of FTA Circular 9040.1G. All recipients must follow the Grants Management Requirements of FTA Circular 5010.1D, and the labor protections of 49 U.S.C. Section 5333(b). All competitive grants, regardless of award amount, will be subject to the congressional notification and release process. Technical assistance regarding these requirements is available from each FTA regional office.

iii. Buy America

The FTA requires that all capital procurements meet FTA’s Buy America requirements that require all iron, steel, or manufactured products be produced in the U.S., to help create and protect manufacturing jobs in the U.S. The Buy America requirements can be found in 49 CFR part 661. Any proposal will require a waiver must identify the items for which a waiver will be sought in the application. Applicants should not proceed with the expectation that waivers will be granted.

iv. Disadvantaged Business Enterprise

Projects that include ferry acquisitions are subject to the Disadvantaged Business Enterprise (DBE) program regulations at 49 CFR part 26. The rule requires that, prior to bidding on any FTA-assisted vehicle procurement, entities that manufacture ferries must submit a DBE Program plan and annual goal methodology to FTA. The FTA will then issue a transit vehicle manufacturer (TVM) concurrence/certification letter. Grant recipients must verify each entity’s compliance before accepting its bid. A list of certified TVMs is posted on FTA’s Web page at http://www.fta.dot.gov/civilrights/12891.html. Recipients should contact FTA before accepting bids from entities not listed on this Web posting. Recipients may also establish project specific DBE goals for ferry purchases. The FTA will provide additional guidance as grants are awarded. For more information on DBE requirements, please contact Britney Berry, Office of Civil Rights. 202-366-1065, email: britney.berry@dot.gov.

v. Planning

The FTA encourages proposers to notify the appropriate State Departments of Transportation and MPOs in areas likely to be served by the project funds made available under these initiatives and programs. Selected projects must be incorporated into the long-range plans and transportation improvement programs of States and metropolitan areas before they are eligible for FTA funding.

vi. Standard Assurances

The applicant assures that it will comply with all applicable Federal statutes, regulations, executive orders, FTA circulars, and other Federal administrative requirements in carrying out any project supported by the FTA. The applicant acknowledges that it is under a continuing obligation to comply with the terms and conditions of the grant agreement issued for its project with FTA. The applicant understands that Federal laws, regulations, policies, and administrative practices might be modified from time to time and may affect the implementation of the project. The applicant agrees that the most recent Federal requirements will apply to the project, unless FTA issues a written determination otherwise. The applicant must submit the Certifications and Assurances before receiving a grant if it does not have current certifications on file.

vii. Reporting

Post-award reporting requirements include submission of Federal Financial Reports and Milestone Reports in FTA’s electronic grants management system.

G. Technical Assistance and Other Program Information

This program is not subject to Executive Order 13272, “Intergovernmental Review of Federal Programs.” The FTA will consider applications for funding only from eligible recipients for eligible projects listed in Section C. Complete applications must be submitted through GRANTS.GOV by 11:59 p.m. EDT on XXXXXX. Contact information for FTA’s regional offices can be found on FTA’s Web site at www.fta.dot.gov.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Renewal of the U.S. Maritime Transportation System National Advisory Committee and Solicitation of Nominations for Membership

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of charter renewal and nomination solicitation.

SUMMARY: Pursuant to authority delegated by the Secretary of Transportation (Secretary) to the Maritime Administrator (Administrator) and the Federal Advisory Committee Act implementing regulations, the Maritime Administration (MARAD) announces the renewal of the U.S. Maritime Transportation System National Advisory Committee (Committee or MTSNAC), by the Secretary of Transportation. The Committee will advise the Secretary on solutions to impediments hindering effective use of short sea transportation and other matters as the Secretary determines. Duration of the MTSNAC is for two years unless renewed by the Secretary. This notice also requests nominations for membership on the Committee.

DATES: Nominations for immediate consideration for appointment must be received on or before 5:00 p.m. ET on May 2, 2016. After that date, MARAD will continue to accept applications under this notice for a period of up to two years from the deadline to fill any vacancies that may arise. The Agency encourages nomination submitted any time before the deadline.

ADDRESSES: Interested candidates may submit a completed application by one of the following methods:
- Email: MTSNAC@dot.gov, subject line: MTSNAC Application.
- Fax: 202–366–8906, ATTN: MTSNAC QSDP, please provide name, mailing address and telephone and fax numbers to send application forms to.
- Mail: MARAD–MTSNAC
  Designated Federal Officer, Room W21–319, U.S. Department of Transportation, 1200 New Jersey Ave. SE, Washington, DC 20590, please provide name, mailing address and telephone and fax numbers to send application forms to.

SUPPLEMENTARY INFORMATION:

I. Under what authority is MARAD renewing the MTSNAC?

The MTSNAC is a Federal advisory committee MARAD sponsors that advises the Department of Transportation on issues related to the marine transportation system. The MTSNAC was originally established in 1999 in accordance with the recommendations made in a Report to Congress titled “An Assessment of the U.S. Marine Transportation System,” and mandated in 2007 by section 1121 of the Energy Independence and Security Act of 2007. Public Law 110–140 (46 U.S.C. 55603). The MTSNAC operates in accordance with the provisions of the Federal Advisory Committee Act (FACA), and shall undertake information-gathering activities, develop technical advice, and present recommendations to the Administrator on matters including but not limited to the following:

a. Impediments hindering effective use of short sea transportation, and other matters as the Secretary determines. Duration of the MTSNAC is for two years unless renewed by the Secretary. This notice also requests nominations for membership on the Committee.

III. Do MTSNAC members receive compensation and/or per diem?

Committee members will receive no salary for the participation in MTSNAC activities. While attending meetings or when otherwise engaged in Committee business, members may be reimbursed for travel and per diem expenses as required to comply with provisions contained in the Lobbying Disclosure Act of 1995 (Pub. L. 110–81).

d. Strengthen maritime capabilities essential to economic and national security;

e. Modernize the maritime workforce and inspire and educate the next generation of mariners;

f. Foster maritime innovation; and,

g. Topics related to the Agency’s mission that the Maritime Administrator may charge the Committee with addressing.

II. Who should be considered for nomination as MTSNAC members?

The Maritime Administration seeks nominations for immediate consideration to fill approximately 10 positions on the Committee for the upcoming 2016–2018 charter term, and will continue to accept nominations under this notice on an on-going basis for two years for consideration to fill vacancies that may arise during the charter term. Member appointment terms run for two years concurrently with the Committee charter.

Members will be selected in accordance with applicable Agency guidelines based upon their ability to advise the Administrator on marine transportation issues. Members will be selected with a view toward a varied perspective of the marine transportation industry, including (1) ports and terminal operators; (2) vessel operators; (3) shippers or beneficiary cargo owners; (4) shipbuilders; (5) other modes of transportation; (6) relevant policy areas such as innovative financing, economic competitiveness, performance monitoring, safety, labor, and environment; (7) freight customers and providers; and (8) government bodies.

Specifically, the Agency seeks to balance the following interests to the extent practicable: State departments of transportation; State, local, and tribal officials; local planning offices; shippers, businesses, and economic development; freight forwarders; rail, ports, trucking, and pipelines operations; workforce including both shipboard and waterfront workers, safety, and environmental interest. Registered lobbyists are not eligible to serve on Federal Advisory Committees. Registered lobbyists are lobbyists required to comply with provisions contained in the Lobbying Disclosure Act of 1995 (Pub. L. 110–81).
